Stop Turning the Crank

Wednesday, August 19th at 1:00 PM (EST).

For many business owners, the status quo is all they know. Having learned business management from outdated, archaic texts, these owners grasp firmly to their traditional financial statements and try each month to coax out some level of incremental improvement. The problem is that owners are not really looking at the dynamics that influence their business – the improvements and nuances that are occurring daily with their customers. The goal is to remove the blinders of old-fashioned business management and substitute a more dynamic approach to business performance. This presentation identifies 6 different performance attributes that will allow you, the owner, to more effectively operate your business.

The presentation will also review some of the key points from the last other webinars from this past year. This is an excellent opportunity to get some great business education and review key points from any webinars you might have missed!

Join AfA & Brad Dawson from LTV Dynamics on Wednesday, August 19 at 1:00 PM (Eastern Time) for this exciting webinar!

To register, please e-mail Brandon Corbett at bcorbett@kellencompany.com with your name, phone number and e-mail address. A confirmation reply will follow.
